

How To Get Your Project Going

Review Your Contract . . .

- ✓ Confirm the accuracy of your personal information including your email to maximize communications.
- ✓ From the Base Quote area select the type of fence you would like installed.
- ✓ Then select the options you would like for your fence from the column on the left by circling. Strike a line through any additional options you decline.
- ✓ Total your options and place that total in the Options to be Added box.
- ✓ Insert your base quote choice cost, before your discount, in the box indicated.
- ✓ Following down that column, total the two together.
- ✓ Subtract your discount and sub-total your order.
- ✓ Insert your 1/3 deposit and subtract from the sub-total.
- ✓ Insert balance due in the Balance box.
- ✓ **Sign your contract.**

A 1/3 deposit is required along with the signed contract. You can fax, email or mail the contract. The deposit can either be a check mailed with the contract or you can call and provide credit card information. We accept MasterCard, Visa and Discover.

After the above is complete, The Fence Authority will schedule your installation date. In order for The Fence Authority to install your fence properly and on the date scheduled, there are some steps you, as our customer, must perform before our crew arrives.

What you must do

- ✓ Obtain a Fence permit and/or HOA approval.
- ✓ Must meet with crew on day of installation to indicate actual fence placement.
- ✓ Establish property lines prior to install - a survey by others may be necessary.
- ✓ Clear fence line of all obstructions or brush.
- ✓ Provide water and electricity to install crew.
