Customer Name: _____

Thank you for the confidence you have placed in our company. It is our goal to work as a team to provide a comprehensive and professional home improvement experience. Just as a reminder, to assist us in a timely installation of your new fence, there are some things you need to do before we install your fence:

- The customer is to obtain a fence permit and/or HOA approval. Our contractor license may be registered under The Adirondack Group. Inform us when obtained (if necessary).
- Establish property lines. A survey may be necessary.
- Clearly mark any **private** underground electric, sprinkler, invisible fencing, pool or propane lines for pools, etc.
- Clear the fence line of all obstructions such as brush, fire wood, etc.
- You will need to be home at the start of the project to review the site and provide water, electricity and arrange for final payment.
- Any changes to your project must be finalized prior to our arrival to install fence. Otherwise you will incur premium costs on that day.
- **Inclement weather greatly impacts the installation schedule, therefore the stated lead time may change.**

Your cooperation with the above items will ensure a timely and efficient fence installation. Some of these may not apply to you because of the positioning of your fence. **Please confirm any changes to your project prior to the day of installation otherwise you may cause delays in the installation process and incur additional charges.**

**To schedule your installation please call our scheduling team
at 610.793.1637
the week of _____.**
